

UNI EN ISO 14001 SALOV S.p.A. Management Manual

Attachment 2 of the Manual ENVIRONMENTAL POLICY

SALOV S.p.A., for its activities in the production of extra virgin olive oil, olive oil, and bulk and packaged seed oils, carried out at the Massarosa (LU) production site, has been certified according to UNI EN ISO 14001:2004 since 2010.

On the occasion of the system's adaptation to the new UNI EN ISO 14001:2015 standard, the Management has reviewed its Environmental Policy.

The Environmental Policy is consistent with the Quality Policy as well as the Safety Policy and the overall Company Policy from which they derive.

SALOV S.p.A. is committed to operating in compliance with all applicable Laws and Regulations and to pursuing continuous improvement in its performance, aimed at reducing the impacts of its environmental aspects and preventing pollution. SALOV S.p.A., having decided to pursue an Environmental Policy focused on continuous improvement:

- guarantees compliance with environmental, safety, and food hygiene regulations through systematic monitoring of their evolution over time.
- modernizes its plants using the best available and economically applicable technologies.
- periodically updates its environmental aspects, assessing the environmental performance of the site, and evaluates in advance the environmental impacts arising from new processes or changes to existing ones.
- is committed to preventing any non-conformity in the Environmental Management System and any environmental emergency through constant surveillance of activities and plants.
- promotes the awareness and responsibility of its workers towards environmental protection through targeted training and information activities.
- sends specific procedures to external companies operating at the production site to be followed during their stay.
- disseminates the Environmental Policy to its Personnel and makes it available to the Public, with whom it pursues an open dialogue.
- ensures its collaboration and cooperation with all Public or private Entities engaged in environmental protection and emergency prevention, providing an adequate contribution according to its role in the community.
- is committed to identifying the needs and expectations relevant to the stakeholders in the context in which the company operates, and if they are not already met, it commits to implementing actions aimed at meeting them.

UNI EN ISO 14001 SALOV S.p.A. Management Manual

SALOV S.p.A. prioritizes:

- the systematic monitoring of its water discharges and atmospheric emissions.
- the monitoring and reduction, where possible, of water and electricity consumption.
- the continuation of efforts made for the proper management of waste, relying on authorized and specialized companies.
- the prevention of accidents and emergency situations.

In line with the principle of Sustainable Development, SALOV S.p.A. considers this statement a priority commitment for conducting its activities in respect of the environment.

Massarosa, the 20th of October 2020

The Environmental Officer
